

8 Great STEM Travel Destinations Featured in Student Travel Planning Guide

The editors of *Student Travel Planning Guide* (STPG) have selected eight top STEM (Science, Technology, Engineering, Math) travel destinations for student groups to be featured in the magazine's annual back-to-school edition and online StudentTravelPlanningGuide.com.

Cities were selected based on their capability of providing outstanding opportunities in the STEM field for children of all ages outside the classroom and their overall appeal as desirable tourist destinations for groups seeking unique, engaging experiences while traveling.

This year's featured STEM destinations include:

1. Houston, Texas
2. Huntsville, Alabama
3. Seattle, Washington
4. Tampa, Florida
5. Chicago, Illinois
6. Miami, Florida
7. San Francisco/Silicon Valley, California
8. Columbus, Ohio

Randy Mink, managing editor for STPG, said, “I think our profiles of top STEM cities will inspire educators and get them thinking about crafting trips that will not only enhance the career paths of their science and math students but provide plenty of fun along the way.”

Through both print and digital feature articles, the magazine will profile each destination and how it provides an extraordinary STEM travel experience.

“We look to shine a bright spotlight on these destinations and capture the interest of busy teachers who are researching travel destinations and plotting out new itineraries for their class trips,” said Jeff Gayduk, publisher. “In the process, brands can promote their experiences to this targeted community through both our print and online mediums.”

About Student Travel Planning Guide

With a reach of 84,037 readers, Student Travel Planning Guide (STPG) is the most popular resource for traveling teachers. Through an annual back-to-school print issue, digital edition, content-based website and bi-weekly newsletter, STPG is the essential resource for planning an extraordinary student group trip.
